

Punch® 40EC – Fungicide:

Active Ingredient

400 gr/lit Flusilazole

Formulation

Emulsion Concentrated

Packaging

10x50 ml.

Registration Date and Number

08/01/1988, 2096

General information:

It is a systemic fungicide which belongs to "Sterol Inhibitor" group with broad spectrum. It is used for *Uncinula necator* in wineyard, *Venturia inaequalis* and *Podosphaera leucotricha* in apple, *Cercospora beticola* and *Erysiphe polygoni* in sugar beet. It has protective and curative effect. It is rapidly absorbed by the foliar of the plant and it moves from bottom to top (acropetal).

Usage:

Crops	Disease	Use Rate	Pre Harvest Intervals
Grapes	<i>Uncinula necator</i>	3 cc/100 lt water	30 days
Apple	<i>Venturia inaequalis</i>	5 cc/100 lt water	30 days
	<i>Podosphaera leucotricha</i>	6 cc/100 lt water	
Sugar beet	<i>Cercospora beticola</i>	20 cc/100 lt water	30 days
