

PRINERGY

Digital Work Flow To

Cromalin[®] b2

PRINERGY

PDF,
DCS, DCSII

Integration Summary: Hot folders are published by the DuPont[™] Cromalin[®] b2. These folders are mapped at the Prinergy system as network drives. A workflow is established on the Prinergy system to write the suitable file format to the mapped drive. Files are automatically processed, color matched, and output from the DuPont[™] Cromalin[®] b2. DCS II or PDF is the recommended file format to utilize spot color functionality. PDF is recommended for four color process only.

OPTIONS NEEDED: NONE
