

Digital Work Flow To

Cromalin<sup>®</sup> b2

PS, PDF, EPS,  
DCS, DCSII, TIFF,  
TIFF/IT

**Integration Summary:** Hot folders are published by the DuPont<sup>™</sup> Cromalin<sup>®</sup> b2. These folders are mapped at the Rampage system as network drives. A workflow is established on the Rampage system to write a suitable file format to the mapped drive. Files are automatically processed, color matched, and output from the DuPont<sup>™</sup> Cromalin<sup>®</sup> b2. Spot color workflows are supported.

**OPTIONS NEEDED:** DuPont's Scitex key is required if TIFF/IT or Scitex formats are needed to be utilized from Rampage<sup>®</sup>. All other formats generated by Rampage<sup>®</sup> do not require any additional options on the DuPont<sup>™</sup> Cromalin<sup>®</sup> b2. File formats output by Rampage vary dependant on Rampage<sup>®</sup> optional modules.
