

# Dylux<sup>®</sup> imposition proofing solutions

## DuPont Dylux<sup>®</sup> Digital Blueline for inkjet wide format printers

Now, DuPont Color Proofing has expanded its line of DuPont Dylux<sup>®</sup> Digital Blueline inkjet proofing media with the introduction of both a single- and double-sided proofing media optimized for wide format printers such as the Epson, HP, Encad, and Hyphen Proofware Duo line of printers. DuPont Dylux<sup>®</sup> Digital Blueline allows users who have already installed these wide format printers to produce high quality, color imposition and design proofs in a totally digital workflow.

Unlike other inkjet proofing media, DuPont's superior coating technology offers the user the ability to put down highly saturated color while maintaining sharp line and color resolution. In addition, the DuPont Dylux<sup>®</sup> Digital Blueline media has superior bleed control, is fast drying and curl resistant. Users are able to see all the elements of the job assembled on a full printing size sheet, which helps catch potentially costly mistakes before film and plate making (or worse yet, on press). Rely on DuPont Dylux<sup>®</sup> Digital Blueline to give you a boost of confidence in your proofing process.

### DuPont Dylux<sup>®</sup> Digital Blueline single-sided media

36" x 100' rolls, 100-gram weight, matte finish

**Stock #363898**

### DuPont Dylux<sup>®</sup> Digital Blueline double-sided media

42" x 100' rolls, 100-gram weight, matte finish

**Stock #H54454**
