## Triton™ C Herbicide

Triton™ C Herbicide is considered a mechanical mixture of two individual products. Attached are the two component products MSDS which make up DuPont™ Triton™ C Herbicide; BASF ACCORD® and DuPont™ Refine® SG.

Since BASF ACCORD® and DuPont™ Refine® SG do not interact chemically when combined, the mixture can therefore be assumed to have the same properties and hazards as the individual components. Some of the main hazards are listed below however please review the DuPont™ Triton™ C Herbicide booklet as well as the attached two MSDS for a full and complete understanding of the hazards associated with each product before use.

### **Hazard Identification**

#### Health

##### Quinclorac

Irritating to eyes, respiratory system and skin.

##### Thifensulfuron methyl & Tribenuron methyl

May cause skin irritation, skin sensitization, eye irritation, upper respiratory tract irritation.

#### Environmental

##### Quinclorac

There is a high probability that the product is not acutely harmful to aquatic organisms.

##### Thifensulfuron methyl & Tribenuron methyl

Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Do not apply where/when conditions favor runoff.
