*\*The designation "stable value" does not suggest that this investment option will not experience any fluctuations in its net asset value.*

<sup>1</sup>Use of the term "Fund" is for reference only; it does not constitute a separately managed registered investment company.

<sup>2</sup>DuPont company stock gives you the potential for capital appreciation. This option is a single stock investment. As there are no other forms or types of investments in this option, the value of the stock stands on its own and generally carries more risk than do the funds offered through the Plan.

The fund categories and risk/return spectrum presented by Mercer Investment Consulting are intended to provide a general evaluation of the risk and potential return of each asset category. It is not meant to predict future performance or the volatility of any investment option or category.

Investing in funds, which are intended as long-term investments, involves risk, including the possible loss of principal. Investments in foreign securities or sector funds, including technology or real estate stocks, are subject to substantial volatility due to adverse political, economic or other developments and may carry additional risk resulting from lack of industry diversification. Funds that invest in small- or mid-capitalization companies experience a greater degree of market volatility than those of large-capitalization stocks and are riskier investments. Bond funds have the same interest rate, inflation, and credit risks associated with the underlying bonds owned by the fund. Generally, the value of bond funds rises when prevailing interest rates fall and falls when interest rates rise. Investing in lower grade debt securities (high yield bonds) may be subject to greater market fluctuations and risk of loss of income and principal than securities in higher rated categories. There are ongoing fees and expenses associated with investing. Bear in mind that higher return potential is accompanied by higher risk.

**Investors should carefully consider the investment objectives, risks, charges and expenses before investing.**
