Embossed Tynex[®]

A New Pattern to Grow Toothbrush Sales

New embossed Tynex[®] filaments give you another powerful tool for differentiating a line of toothbrushes from generic competition and from your other lines.

Each embossed Tynex[®] filament comes with a regular pattern along its length. The pattern consists of tiny indentations on one side and corresponding bumps on the other.

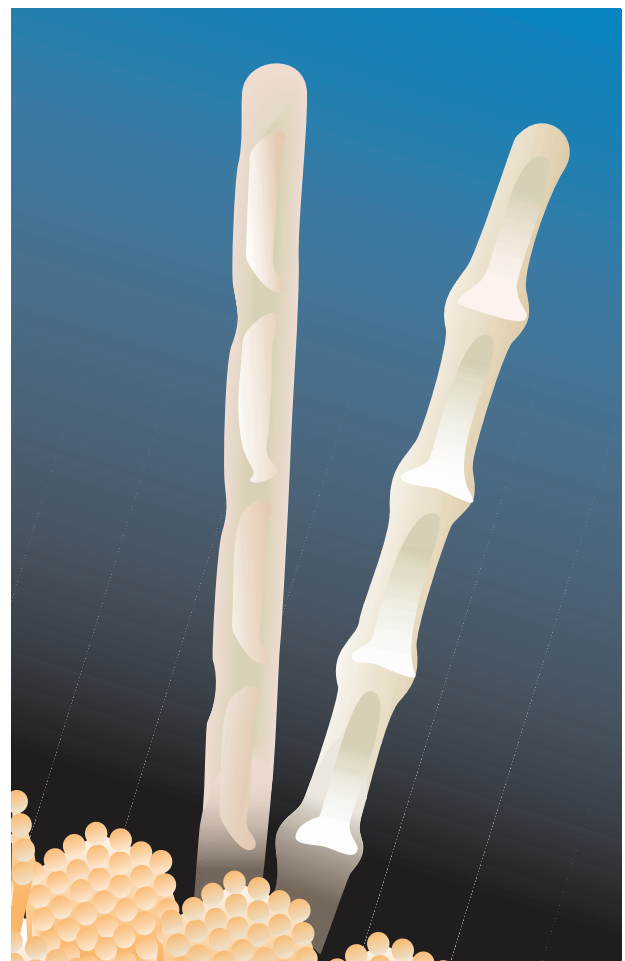

The textured surface, combined with the superior performance of nylon 612 polymer compared with other filament polymers, gives you the ingredients of a convincing marketing story.

More Design Options

Consider other DuPont Filament Innovations to expand your market opportunities. DuPont has developed a wide range of unique filaments that differ from standard filaments in look, feel and

- **Bumpy surface plays to the consumer's perception of an effective scrubber.**
- **Indentations help carry toothpaste to teeth and gums.**
- **Sparkling appearance:**
 - **Attracts shopper attention**
 - **Makes your brush look different.**
- **Up to 50% longer life than filaments based on ordinary nylons.**
- **The consistent quality and performance you expect from DuPont[™] Tynex[®] brand filaments.**

cleaning characteristics. You can use them independently, in conjunction with other filaments or with special handle and head designs to make your toothbrushes stand out in the marketplace.

Shapes	Colors	Special Effects
Rectangular	Translucent	Feathered
Hexagonal	Fluorescent	Galaxy
Diamond	Opaque	Brilliance
Custom shapes	Custom	Vista
