MAXIMIZE YOUR ABILITY TO PROTECT YOUR SOLDIERS WITH DUPONT™ NOMEX® LIMITEDWEAR FOR MILITARY.

For more information on NOMEX® Limitedwear for Military, please call USA Customer Service at 1-800-931-3456

Flame resistance you can trust.

The most important thing a fire protective garment must do is also the most obvious—protect you from fire. That's exactly what DuPont™ NOMEX® Limitedwear for Military does.

Light weight. High value.

Fire protection equipment can be very costly. DuPont™ NOMEX® Limitedwear for Military can be easily distributed to all who need intermittent flame protection. The limited use garments offer lightweight protection that can fit right over a battle dress uniform and are made with the same NOMEX® used in NOMEX® premium coveralls for air crews and tank crewmen. And caring for NOMEX® Limitedwear for Military garments is simple. They can be laundered like any other uniform, washing away dirt without affecting the fire-resistant integrity. And for some instances, a 100% premium NOMEX® coverall may not be necessary.

In the field or on the base.

Whether you are repairing fighter jets in a hangar or patrolling in the field, DuPont™ NOMEX® Limitedwear for

Military is a smart option. Perfect for field soldiers, the garments can be vacuum packed for compact storage. And they are available in printed camouflage pattern.

Tested on THERMO-MAN®.

NOMEX® Limitedwear for Military has been tested on THERMO-MAN®, our instrumented six-foot, one-inch tall, high-temperature manikin system. The most advanced life-size thermal burn injury evaluation in the world, it has 122 heat sensors to give us the most accurate evaluation of the effectiveness of our garments. THERMO-MAN® was dressed in typical fashion, and subjected to a flame situation with strong burn protection results.

About DuPont

NOMEX® Limitedwear for Military was developed by DuPont, the leader in personal protection garments for over 40 years. The garment was designed by researchers at the U.S. Army Natick Labs. It is an outstanding choice for the primary fire protection. And is just another achievement in DuPont's 200 year relationship with the United States Military.

Garment Design and Specifications: The specifications for garment design were approved by the U.S. Government. No change can be made to the specifications without the prior written permission of the U.S. Government. Using the independent skill and expertise of the U.S. Government, the U.S. Government selected NOMEX® Limitedwear for Military as the fabric for the garment. The U.S. Government assumes full responsibility for providing appropriate warnings to users of the garment. The U.S. Government bears all responsibility, risk and liability for performing or having performed all appropriate tests needed to reasonably assure suitability of the fabric and garment and the safety and efficacy of the garment, and for providing garment users with the appropriate use warnings.

See how NOMEX® Limitedwear for Military enhances protection against flame threats.

Thermal Manikin Test Results

For the ensemble without Limitedwear, tests beyond 3 seconds' exposure time were not conducted due to extreme levels of Total Predicted Body Burn.

Test conditions: Heat flux of 2 cal/cm²-sec; 2 burns for Hot Weather BDU only, 7 burns for all others; Coveralls tested as intended to be worn.

For ordering of the NOMEX® Limitedwear for Military coveralls, please refer to the following table for size and Manufacturer Part Number:
