

DuPont at a Glance

DuPont is a dynamic science company, delivering science-based solutions in markets such as food and nutrition, health care, apparel, home and construction, electronics and transportation. More than 200 years ago, DuPont was primarily an explosives company. More than 100 years ago, our focus turned to global chemicals, materials and energy. Today, in our third century, we deliver science-based solutions that make real differences in real lives. Look closely at the things around your home and, chances are, you'll find a DuPont imprint.

Our ability to adapt to change and our foundation of unending scientific inquiry enabled this two-century journey to becoming one of the world's most innovative companies. But in the face of constant change, innovation and discovery, our core values have remained constant: commitment to safety, health and the environment; integrity and high ethical standards; and treating people with fairness and respect.

What has this commitment allowed us to accomplish? Take a look:

2004 revenues: \$27.3 billion

Employees: 60,000.

Global: Operating in 70 countries worldwide.

R&D: 75 research and development facilities around the world, including 40 in the United States and 35 in 11 nations.

Chairman and CEO: Charles O. (Chad) Holliday, Jr., is Chairman and Chief Executive Officer. He has been with DuPont for more than 30 years. Chad has been chief executive officer since February 1, 1998, and chairman since December 31, 1998. He is a graduate of the University of Tennessee where he received his bachelor's degree in Industrial Engineering.

Fortune 500: 67th largest U.S. industrial/service corporation.
