

DuPont™ Throttle™ XP

herbicide

High-performance bareground weed control

You count on getting the most control you can get with the least amount of hassle. Now you can get knockdown and soil residual control of grasses and broadleaf weeds in an easy-to-use formulation.

Introducing Throttle™ XP herbicide

DuPont™ Throttle™ XP herbicide delivers enhanced pre- or early post-emergent control of 117 tough broadleaf weeds and grasses. Count on Throttle™ XP to help keep bareground areas clear of grasses, thistles, tall waterhemp and SU-resistant weeds such as kochia and Russian thistle. Plus, for added convenience, Throttle™ XP is available in a homogeneous blend that's easier to mix and measure.

Benefits of new DuPont™ Throttle™ XP

- Combines the proven performance of chlorsulfuron, sulfometuron methyl and sulfentrazone in one easy-to-use product.
- Provides both foliar knockdown and soil residual of broadleaf weeds and grasses.
- Delivers pre- and early postemergent control of kochia, Russian thistle, tall waterhemp and other tough weeds. For best results when weeds are emerged at application, a postemergence burndown herbicide, such as glyphosate, should be included in the treatment.

- Minimizes mixing and cleanup — homogeneous blend formulation incorporates three proven active ingredients, so there's less measuring and mixing, and fewer containers for disposal.
- Offers more flexibility — custom blends available.

Bareground control made easier

Throttle™ XP herbicide features advanced DuPont XP formulation technology, making it easier to mix and more accurate to measure.

The new formulation is less dusty and resuspends faster to minimize downtime after rain and wind delays.

How to get the best results with Throttle™ XP

Apply Throttle™ XP at the rate of 12.5 ounces per acre as a preemergence or early postemergence spray before or during the rainy season, when weeds are actively germinating or growing.

Choice of container sizes

Throttle™ XP is available in 3.9-pound and 11.72-pound jugs.

Broadleaf weeds and grasses controlled by DuPont™ Throttle™ XP herbicide

Throttle™ XP effectively controls the following broadleaf weeds and grasses when applied at the rate of 12.5 ounces of product per acre:

Broadleaf weeds		Grasses
