

DuPont Vegetation Management

Custom-packaged DuPont™ PrecisionPac™ containers allow ordering the exact amount of herbicide you need

Vegetation management herbicides from DuPont delivered in revolutionary custom-packaged containers are the ultimate convenience. Order the amount of product you need from your DuPont Vegetation Management distributor, and you get an easy-to-handle container. Once you've emptied the container, you return it to the distributor for reuse, or discard the container if it is a one-way container.

DuPont herbicides available in custom-packaged containers are:

DuPont™ Escort® XP
DuPont™ Landmark® XP
DuPont™ Oust® Extra
DuPont™ Oust® XP
DuPont™ Telar® XP

PrecisionPac™ containers eliminate opening and pouring product from several containers for large-scale projects. This reduces the potential for exposure for the spray mixer and applicator.

The PrecisionPac™ containers are refillable, or are one-way containers shipped by your DuPont distributor.

Benefits of PrecisionPac™ custom-packaged containers

Using products delivered to you in custom-packaged containers saves time and improves your spraying efficiency in many ways. The various benefits to you from ordering your herbicides in custom-packaged containers include:

- Helps improve mixing efficiency: reduces time opening, handling and measuring product from several product containers.
- Helps minimize the risk of spills or breakage because the containers are durable units.
- Minimizes the need to handle and measure from multiple containers.
- On-site mixing errors can be reduced, as only the amount needed for a project arrives from the distributor.
- Eliminates the potential for over or under applications because the exact amount needed for a sprayer tank is easily mixed, instead of using multiple containers.
- Inventory control is simplified because you order only the amount of product you need, eliminating long-term storage of unused product.
- Addresses environmental stewardship through a proactive system of maintaining exact control over product measurement and container disposal.
- When the container is filled at a DuPont distributor, a printed label is attached, which provides specifics on content and fill date.

For more information

Contact your local DuPont Vegetation Management distributor or DuPont representative for more information about ordering your herbicides in custom-packaged containers. And visit us on the Web at vm.dupont.com.
