

DuPont Liquid Packaging Systems Liqui-Box™

DuPont™ Q-Connect™

**“Getting connected
has never been easier”**

**Disposable sterile tube,
tap or adaptor – shipped with package**

**Tube pierces seals and
becomes integral with spout**

Standard B2S spout

Outer dust cover

Inner aseptic membrane

**Q-CONNECT™
SECTIONAL VIEW**

Introducing the latest in technological fitment evolution from DuPont Liquid Packaging Systems. The new Q-Connect™ aseptic tube dispensing system allows your customers to get connected with less hassle, less mess, while maximizing the performance and value of the aseptic package.

The Q-Connect™ fitment is a one piece molded cap that features two security membranes. To use the package simply insert the included sanitary tube into the fitment. The end of the tube seamlessly punctures the security membranes, virtually eliminating product exposure to the air, while disallowing any outside contaminants to enter the package.

Q-Connect™ is the perfect partner to your Liqui-Box 2000 aseptic filling system.

The miracles of science™

Q-Connect™ is designed to give your Aseptic Packaging business a whole new lease on life

- *Connecting without removing a cap and exposing the product inside means a safer more sanitary system*
- *Fill and dispense with a tube through a single spout instead of a costly double spouted bag*
- *Add your favourite dispensing tap to the Q-Connect™ spout*
- *Potential for compromised shelf life due to pre-attached tubes of poor oxygen barrier material is virtually eliminated*
- *End-users love how quick and easy it is to set up. Processors are impressed with how easy the Q-Connect™ is to implement into existing systems*
- *The Liqui-Box 2000 aseptic filling system and Q-Connect™ piercing tube connecting fitment are ideal for cream dispensing systems, viscous products such as cheese sauce dispensing and other condiment dispensing applications plus a host of non-food applications*

The Liqui-Box aseptic filling system and the Q-Connect™ fitment offer a cost-effective and easy-to-use option to move to a non-refrigerated aseptic dispensing system. For end-users, there has never been a better time to think about updating to a new more efficient system.

Q-Connect™, the no-hassle, no-mess way to offer convenience to your customers, while you maintain and even improve your bottom line.
