

# DuPont™ Krytox® Solvent

DuPont™ Krytox® fluorinated oils and greases are resistant to most common organic solvents. Because of this resistance, cleanup of Krytox® lubricants and other PFPE oils and greases requires special solvents that are ineffective on hydrocarbon-based lubricants and preservatives.

Brushing or wiping with rags will significantly accelerate the cleaning process. Parts should be wiped as clean as possible before the use of Krytox® solvent, to minimize use. When possible, immersion in an ultrasonic cleaner aids in the cleaning of bearings and other parts with hard-to-reach, recessed areas.
