The miracles of science™

DuPont Lubricants & Coating Solutions is working with corrugator boxboard and sheet plants to develop new products that increase productivity, like new CorrSurface Protect 3560. When applied to ink and glue trays, it can significantly improve the ease of glue/ink pan cleanup leading to reduced equipment turnaround time.

Key Features:

- Reduces tray cleanup time from 1 hour to 20 minutes
- Eliminates need for pan scraping, reducing work hazards
- Applies during shutdown; no re-application during operation
- Simplifies application via felt-tip applicator or spray device
- Increases productivity by getting machines on-line faster
- Provides quick and easy water cleanup

To schedule a demo at your plant, or to learn more about CorrSurface Protect 3560, call 1-800-441-9503 and mention code 3560-DM.
