

What's thinking outside the box? A knife lubricant that won't cause oil stains.

Introducing DuPont™ CorrSurface Protect 310.
The new water-based knife lubricant that can
eliminate scrap production due to oil spotting and
prolong the life of corrugator knife blades.

The miracles of science™

DuPont Lubricants & Coating Solutions is working with corrugator boxboard and sheet plants to develop new products that increase productivity, like new CorrSurface Protect 310. When applied to knife blades in cutting and slitting, it can significantly reduce scrap production by eliminating oil stains caused by traditional knife lubricants. Plus, CorrSurface Protect 310 reduces costs by prolonging knife blade life.

Key Features:

- Eliminates production scrap caused by oil stains
- Helps extend life of knife blades and slitter scorers to reduce costs
- Reduces frequency of knife blade adjustment due to dulling
- Utilizes same lubrication delivery system as traditional lubricant — no additional equipment needed
- Easy changeover from current lubricant with only felt replacement required
- Provides cleaner environment with water cleanup

To schedule a demo at your plant, or to learn more about CorrSurface Protect 310, call 1-800-441-9503 and mention code 310-DM.

And don't forget CorrSurface Protect 3560 for your ink and glue trays!
