

Reduce turbine downtime in no time.

DuPont™ Krytox® is the turbine grease that delivers improved governor control and reliability, extends component life, lowers operating expenses and reduces downtime.

The miracles of science™

Problem

Ordinary lubricants can deteriorate under heat, causing turbine governor camshafts or valve lift bar antifriction bearings, bushings and gears to fail. The result: seizing of the governor control, turbine downtime and increased maintenance costs.

Solution

Just use DuPont™ Krytox®. It's formulated to lubricate and protect turbine governor cams, antifriction bearings, bushings, linkages and gears. It won't oxidize or break down under heat, and offers the lowest life cycle cost available.

For a free demonstration, call 1-800-424-7502 and mention code STG-DM. Or learn more at www.krytox.com.
