

DuPont Microcircuit Materials

Providing Innovative Photovoltaic Solutions

Presenting DuPont™ Solamet® for Thin Film PV

- High Conductivity
- Low Contact Resistance
- Good Line Resolution
- Adhesion to Transparent Conductive Oxides

Materials

- Front Side Ag
- Bus Bar Ag
- Solderable Ag
- Carbon Back Contact

Applications

- Cl(G)S
- Amorphous-Si
- CdTe
- Dye Sensitized Solar Cells
- Organic
- Heterojunction

Substrates

- Polyimide
- Polyethylene Terephthalate
- Polyethylene Naphthalate
- Glass
- Stainless Steel

DuPont™ Solamet® is part of a broad and growing portfolio of products represented by DuPont Photovoltaic Solutions, which connects science and technology from across the company on a global scale to help support the dramatic growth in the photovoltaic industry.
