

# STOP™ Safety Training Observation Program

## OVERVIEW

The STOP™ series provides a path to workplace safety excellence by making safe behavior and workplace conditions part of the work culture, thus preventing injuries and incidents. It is the most popular and successful workplace safety training on the global market today.

**STOP™ for Supervision**  
**Advanced STOP™**  
**STOP™ for Employees**  
**STOP™ for Each Other**  
**STOP™ for Ergonomics**  
**STOP™ Implementation Assistance Workshop**  
**STOP™ Implementation Resource**  
**STOP™ Introduction Workshop**  
**STOP™ Assessment Service**  
**STOP™ DataPro™**  
**street smart™ chemistry**

STOP™ programs use a combination of methods to give people the information, skills and willingness to work more safely, maximize their learning and apply what they learn to the real world. The programs feature a three-part approach:

- **Individual self-study.** Workbooks are used to introduce basic concepts and begin safety skill development.
- **Field or application activities.** STOP™ program participants practice what they have learned in their own work areas.
- **Group meetings.** After viewing a video, participants discuss what they have learned and consider how it can be applied.

### STOP™ Programs Now Available:

#### STOP™ for Supervision

A comprehensive, behavior-based training program, STOP™ for Supervision establishes the framework for the entire STOP™ series. It teaches managers, supervisors and team leaders how to observe people as they work. By talking with people to acknowledge safe acts and correct unsafe acts, workers are encouraged to follow safe work practices.

#### Advanced STOP™

Builds upon the skills taught in STOP™ for Supervision and develops the advanced skills needed to make safety audits more meaningful and effective.

#### STOP™ for Employees

A complement to STOP™ for Supervision, STOP™ for Employees teaches participants how to develop safety awareness and self-auditing skills.

*The miracles of science™*

### STOP™ for Each Other

Focuses on peer-to-peer safety, teaching participants to interact with their coworkers, incorporate safety in their everyday activities and make safety second nature.

### STOP™ for Ergonomics

Builds on the principles and skills introduced in the STOP™ series and applies them to ergonomics, an essential component of workplace safety.

### STOP™ Implementation Assistance Workshop

A customized, on-site workshop conducted by DuPont STOP™ experts that helps build a strong foundation for the STOP™ program and increase involvement across your organization.

### STOP™ Implementation Resource

This 1 1/2-day workshop provides expert assistance and advice on-site to objectively assess the implementation of any of the following STOP™ programs: STOP™ for Supervision, STOP™ for Each Other, Advanced STOP™ and STOP™ for Ergonomics.

### STOP™ Introduction Workshop

Introduces STOP™ concepts and principles and shows how it can help your company reduce injuries, incidents and associated costs.

### STOP™ Implementation Assessment

Reviews STOP™ implementation at your site to assess the success of the implementation, identify gaps and recommend next steps for improvement in your safety audit program.

### STOP™ DataPro™

A convenient new online tool for capturing safety audit data and generating reports. It quickly and easily enables in-depth understanding of workplace safety using your STOP™ audit data to review findings, identify trends, track corrective actions and monitor the frequency and effectiveness of safety audits.

### Also available:

#### **street smart™ chemistry**

DuPont has compiled years of hands-on chemical handling and emergency response experience to produce this comprehensive resource for first responders and chemical management professionals.
