COMMUNITY OUTREACH
DuPont is committed to improving the quality of life and enhancing the vitality of the communities in which it operates throughout the world. Through financial contributions and the volunteer efforts of its employees, DuPont supports programs and organizations that address social progress, economic success and environmental excellence - all vital components of community sustainability.

In Indonesia, we focus our activities relating to the three mega trends -- Feeding the world (improve agricultural productivity; educate farmers on better agricultural process, provide farming tools to increase productivity. Reduce our dependence on fossil fuel (install Solar panels for community in West Java, keeping people and the environment safe). Protecting people (facilitate infrastructure development, such as road and bridge construction, community water tanks, electricity supplies and improved public hygiene facilities).
