

DuPont™
Cyrel® FAST TD4260
“THE MAGIC OF THINKING BIG”

With DuPont™ Cyrel® you will make a better impression!

At DuPont, we have been technology and market leaders in flexographic printing plates for 30 years. Over the past three decades, Cyrel® has formed an integral part of the history of flexography, and still today we are driving the industry by introducing innovative new applications and improvements for the packaging printing industry.

The miracles of science™

DuPont™ Cyrel® FAST TD4260 – “The magic of thinking big”

Innovation at the speed of your business

Cyrel® FAST uses a dry thermal technology for plate development, completely eliminating conventional solvents and aqueous washout solutions. In addition to the obvious environmental and health gain, it also reduces the plate processing times by up to 75%.

The latest version of the Cyrel® FAST system is ideal for trade shops that tend to require a high volume of plates in varying sizes. This new system retains all of the benefits of the smaller Cyrel® FAST 1000TD, producing a high quality finished plate in less than one hour, while being environmentally sensitive. The thermal technology eliminates the need for solvents and waste polymer is collected on a non-woven fabric, making disposal simple and safe.

Working in conjunction, DuPont and Esko have developed a totally integrated offering to cover the majority of flexo applications.

DuPont™ Cyrel® FAST TD4260 and Esko's Cyrel® Digital Imager Spark 4260 are designed to bring the benefits of direct image exposure to Flexible Packaging printers and higher volume trade shops.

The Cyrel® Digital Imager Spark 4260 provides a fast, reliable and high-quality digital plate exposure solution. The Esko's CDI Spark addresses the highest quality flexo applications, primarily in the flexible packaging and folding carton markets, aiming to meet the needs of a broad range of repro houses and flexo printers.

With DuPont™ Cyrel® you will make a better impression!

At DuPont, we have been technology and market leaders in flexographic printing plates for 30 years. Over the past three decades, Cyrel® has formed an integral part of the history of

flexography, and still today we are driving the industry by introducing innovative new applications and improvements for the industry like Cyrel® digital, Cyrel® FAST and Cyrel® round.

Stay ahead of the competition with the ideal digital workflow.

There is a reason your phone is digital, your clock digital and your music digital. Digital technology offers unsurpassed quality, reduces cost and ensures consistency. This is even more apparent when you consider your platemaking needs.

Whether you plan to take it one step at a time or make a bold leap, we have the technology and people with the experience to help you safely merge onto the road to thermal digital plate making.

We'll give you more than a technological edge – we'll be your technological teammate.
