

**WHY SAFETY NEVER FELT SO GOOD.**

---

---

# **BECAUSE NOW THERE'S DUPONT™ PROTERA™.** **EXCELLENT PROTECTION, DURABILITY AND COMFORT** **FROM THE MAKERS OF NOMEX®.**

---

---

When we created the new DuPont™ Protera™ fabric, we made comfort a priority. But when your work involves the risk of electric arc hazards, protection and safety come first. Now there's a fabric that offers inherent protection and durability like DuPont™ NOMEX® brand fiber, along with better comfort than FR cotton nylon blends.

**BECAUSE  
IT MEETS  
NFPA 70E  
CATEGORY 2  
REQUIREMENTS**

DuPont™ Protera™ meets NFPA 70E Category 2 requirements and the protection won't wash or wear away. But you won't just be safe; you'll also feel better wearing it. In fact, in a recent independent comfort study wearers judged DuPont™ Protera™ the clear winner in overall comfort compared to FR cotton nylon blend garments of similar weight.

**BECAUSE  
THERE'S  
NO NEED TO  
SACRIFICE  
PROTECTION  
FOR COMFORT.**

One of the lightest weight NFPA 70E Category 2 technologies on the market, DuPont™ Protera™ proves that less is more. Because those who tried DuPont™ Protera™ found it to be less "prickly, heavy, stretchy, stiff, clingy, clammy and scratchy" than FR cotton nylon blend garments. Some real-world ways to describe how you don't want to feel.

Of course, comfort and protection don't mean much if the fabric isn't durable enough to stand up to the job. DuPont™ Protera™ is also more rip and tear resistant than our competitors' fabrics. Which goes a long way, to providing more value at an affordable price.

**BECAUSE  
BUILT-IN  
PROTECTION  
DOESN'T  
WASH AWAY.**

You know us for DuPont™ NOMEX®, but we never stop looking for a new way to make it safer and easier for you to do your job. And that means creating new technologies that not only feel good, but also offer excellent protection, durability and value.

In an independent double-blind comfort study participants were asked to compare DuPont™ Protera™ with a competitor's FR garment without knowing which one was which. The winner in comfort in seven different categories? DuPont™ Protera™.

DuPont™ Protera™ offers twice the strength and tear resistance than FR cotton nylon blends from the first wash to the last. And it outperforms FR cotton nylon blends in tear resistance from the start and right through 100 wash cycles.
