

DuPont Certified Star CoaterSM

The following organizations meet or exceed the strict criteria to qualify as a DuPont Certified Star CoaterSM. A DuPont CoatingSolutions technical representative has audited several aspects of their businesses, including facility maintenance, quality and consistency, business improvement practices, customer satisfaction, training, and safety. An independent consultant has reviewed the results of the audit and approved the certification status of the coater. Certifications are granted for a two-year period and coaters are expected to improve upon their scores with each new certification period.
