

DuPont™ Kocide® 2000

fungicide

The best copper protection is now even better!

Patented, state-of-the-art formulation technology makes DuPont™ Kocide® 2000 fungicide superior to all other copper fungicides on the market today.

Kocide® 2000 delivers more, with less

Improved copper bioavailability:

Pound for pound, Kocide® 2000 delivers more bioactive/fungicide/bactericide copper, so you can get more disease control with 25 percent to 40 percent less formulated product per acre, for example:

- 100 pounds of Kocide® 101 or Kocide® DF x 0.75 = 75 pounds of Kocide® 2000
- 100 pounds of Basicop™ basic copper sulfate x 0.6 = 60 pounds of Kocide® 2000

Easy to upgrade: Kocide® 2000 is available in 7.5- or 15-pound bags, which are equivalent to 10- or 20-pound bags, respectively, of Kocide® 101 and Kocide® DF. So, if you used five 10-pound bags of Kocide® DF, you can now use five 7.5-pound bags of Kocide® 2000. If you used five 20-pound bags of Kocide® 101, you can now use five 15-pound bags of Kocide® 2000.

Less cleanup: Kocide® 2000 also can be used instead of liquid copper products which eliminates the need for triple rinsing of a liquid formulation container.

- 100 pints of Kocide® 4.5LF x 1.125 = 112.5 pounds of Kocide® 2000

Improved dispersion: Copper particles cover the plant surface thoroughly and evenly to provide complete initial coverage and to maintain residual control.

Enhanced rainfastness: The copper stays on the leaf to provide longer residual disease control.

State-of-the-art dry flowable formulation: Provides improved suspension and excellent compatibility with most commonly-used pesticides.

Increased disease control: Increased bioactivity, better dispersion and longer residual all add up to make Kocide® 2000 the best copper fungicide your money can buy.
