

DuPont™ Ally® Extra SG

herbicide

With TotalSol® soluble granules

Conversion from DuPont™ Ally® Extra to DuPont™ Ally® Extra SG

Universal conversion: Multiply the Ally® Extra rate you use by 1.37 to find the Ally® Extra SG rate. See examples in the chart below.

New formulation dissolves completely

Ally® Extra SG herbicide is one of the first of a new generation of herbicides featuring TotalSol® soluble granules, an advanced formulation that dissolves completely in water to reduce tank-cleanout headaches and improve performance.

This new technology delivers the following benefits:

- Often more effective against broadleaf weeds than the older dry flowable (DF) suspendible formulations with the same active ingredients.
- Dissolves completely in water — unlike DF suspensions.
- Can be used in a tank mix with a variety of grass and broadleaf weed herbicides.

- Can be tank mixed with most pesticides labeled for use in cereal grain production. The most restrictive language on either product label should apply.
- Is virtually dust free.
- Performance is optimized by the addition of non-ionic surfactants and other spray adjuvants.
- Because the soluble granule formulation dissolves completely in water, it is easier to remove any product residue from the tank, thereby improving tank cleanout.

Note: Only clean water should be used in preparing Ally® Extra SG spray solutions. Any tank-mix partners and adjuvants should be added only after the Ally® Extra SG has fully dissolved.

Use rate conversion				
Ally® Extra rate (oz/A)	x	1.37	=	New Ally® Extra SG rate (oz/A)
0.2	x	1.37	=	0.3
0.3	x	1.37	=	0.4
0.4	x	1.37	=	0.5

Note: Rate conversions are approximate.

DuPont™ Ally Extra® SG herbicide with TotalSol® soluble granules is not available in all states. See your local DuPont crop protection retailer or DuPont representative for details and availability in your state.

This reference guide is not intended as a substitute for the product label for the product(s) referenced herein. Product labels for the above product(s) contain important precautions, directions for use and product warranty and liability limitations that must be read before using the product. Applicators must be in possession of the product label(s) at the time of application. Always read and follow all label directions and precautions for use when using any pesticide alone or in tank mix combinations.
