

# DuPont™ Agility™ SG

herbicide

With TotalSol® soluble granules

*Get the most out of your weed control program*

Introducing new DuPont™ Agility™ SG herbicide with TotalSol® soluble granules, an advanced formulation that's designed specifically to go after group 2 resistant kochia and other tough broadleaf weeds.

## Count on DuPont for more control, more convenience and more wheat

Agility™ SG herbicide combines the power of four active ingredients — with two modes of action — in an advanced formulation that delivers reliable control of ALS-resistant and ALS-tolerant varieties of kochia. But that's only the beginning. New Agility™ SG also controls prickly lettuce, pigweeds, common cocklebur, common ragweed, lambsquarters, common sunflower, wild mustard, Russian thistle, wild buckwheat, Canada thistle and more than 70 other tough broadleaf weeds.

With less competition for nutrients and moisture, your crop can reach its full potential. So you can look forward to a faster, cleaner harvest, and more wheat with less chance of dockage at the elevator.

Plus, Agility™ SG is the latest addition to a new generation of herbicides featuring TotalSol® soluble granules, an advanced formulation that dissolves completely for more consistent weed control and faster, easier spray-tank cleanout.

## The benefits of Agility™ SG

New Agility™ SG is one of the most technically advanced herbicides on the market today:

- Four active ingredients with two modes of action in one product — delivers control in a single-product formulation.
- Just one product to measure — saves time and reduces the risk of measuring errors.
- Controls kochia — including resistant varieties — for a faster harvest and less dockage.
- Advanced, patented formulation dissolves more completely — gets more product on the weeds for better control, leaves less in the tank for easier cleanout.

## New formulation dissolves completely

Agility™ SG herbicide is formulated with DuPont™ TotalSol® soluble granule technology, an advanced formulation that dissolves completely in water, which makes cleaning out spray equipment easier and improves performance:

- Dissolves completely in water unlike older dry flowable (DF) suspensions — so it is easier to remove any product residue from the tank, thereby improving tank cleanout.

- Offers more consistent control of broadleaf weeds under a wider variety of environmental conditions compared to DF suspensions with the same active ingredients.
- Can be used in a tank mix with a variety of grass and broadleaf weed herbicides.
- Can be tank mixed with most pesticides labeled for use in cereal grain production.
- Is virtually dust-free.
- Performance is optimized by the addition of non-ionic surfactants and other spray adjuvants.

Note: Only clean water should be used in preparing Agility™ SG spray solutions. Any tank-mix partners and adjuvants should be added to the spray tank only after the Agility™ SG granules have fully dissolved.

## Use recommendations

### How to get the best results with Agility™ SG

Apply Agility™ SG at the rate of 1.6 to 3.2 ounces per acre for control of the weeds listed in the product label:

- Use 3.2 ounces per acre for heavy infestation of the weeds listed under Weeds Partially Controlled or when application timing and environmental conditions are marginal.
- Use 1.6 to 2.4 ounces per acre for light infestation of the weeds listed under Weeds Controlled.

Always include a spray adjuvant with applications of Agility™ SG.

### For more information

Get control of more weeds and raise more wheat with more convenience with new Agility™ SG herbicide from DuPont. Contact your local DuPont crop protection retailer or DuPont representative for more information. And visit us on the Web at [agility.dupont.com](http://agility.dupont.com).

## Weeds controlled by Agility™ SG herbicide (partial list)

When used according to the label directions, Agility™ SG effectively controls 84 broadleaf weeds, including:

Buckwheat: common, wild  
Chamomile, wild  
Cocklebur, common  
Evening-primrose, cutleaf  
Fiddleneck, tarweed  
Flixweed\*  
Garlic, wild\*  
Kochia\*  
Lambsquarters: common, slimleaf  
Mustard: treacle, tumble (Jim Hill), wild  
Pigweed: prostrate, redroot, rough, smooth, tumble  
Prickly lettuce\*  
Radish, wild\*  
Ragweed, common  
Sunflower, common  
Tansymustard  
Thistle: Canada\*, Russian\*  
Velvetleaf  
Volunteer lentils  
Volunteer peas  
Volunteer sunflower  
Wallflower, bushy  
Waterpod
