

Soybeans

DuPont™ Harmony® SG

herbicide

With TotalSol® soluble granules

The foundation for a “good, solid” broadleaf weed control program

When soybeans are rotated with other crops such as sugar beets, dry edible beans, wheat and corn, the level of weed control in soybeans directly impacts the profitability of the following crop.

A DuPont™ Harmony® SG herbicide tank-mix program not only eliminates tough weeds like lambsquarters, redroot pigweed, Pennsylvania

smartweed and wild mustard, it also provides better control of these weeds if the application is delayed.

Here are the benefits of a Harmony® SG tank mix:

- Provides cleaner fields for rotational crops.
- Provides cleaner fields at harvest,

which allows you to combine faster and gives you more time to prepare for next year's crops.

- Provides broad-spectrum control of key problem weeds, including common lambsquarters, redroot pigweed, Pennsylvania smartweed and wild mustard.

Broadleaf herbicide tank-mix recommendations

Use Harmony® SG at a rate of 0.125 (1/8) oz per acre with recommended rates of tank-mix partners

TANK MIX*	HARMONY® SG	HARMONY® SG + CLASSIC***	HARMONY® SG + BASAGRAN	HARMONY® SG + GALAXY	HARMONY® SG + ROUNDUP ULTRA***
