

# 2009 DuPont Soybean Herbicide Recommendations for Glyphosate-Tolerant Soybeans

Today's soybean growers are facing weed shifts that are challenging the performance of their glyphosate weed control programs.

Weeds that escape a glyphosate-only program can remain in the fields the whole season, becoming progressively harder to control and causing potential profit-robbing yield loss.

A program using a preemergence or post harvest herbicide, followed by a postemergence application, can be effective in managing many tough weeds. Getting your soybean crop started without weed competition can mean the difference between making money on your crop, or losing the fields to weeds.

DuPont has introduced herbicides that complement glyphosate and deliver answers to changing weed control needs.

Application Segment	Herbicide	Rate Recommendation	Key Benefits
<b>Preemergence (before or at-planting)</b> Primary use area: Shorter growing seasons in the northern U.S.	DuPont™ Enlite®	<b>When weeds are &lt; 3" tall:</b> Enlite® 2.8 oz/A + 2,4-D LVE 1 pt/A + 1% v/v COC  <b>When weeds are &gt; 3" tall:</b> Enlite® 2.8 oz/A + 2,4-D LVE 1 pt/A + 1% v/v COC + glyphosate	Two modes of action that deliver consistent control of winter annuals, dandelion, lambsquarters and other glyphosate- or ALS-tolerant/resistant weeds  Consistent contact plus residual control that allows you to spray early and plant into a cleaner seedbed  Allows your post application to be made closer to crop canopy and help reduce the number of in-crop glyphosate applications.  Reliable control even under cool, wet conditions Can be used on all pH soils
<b>Postemergence</b>	DuPont™ Classic®	Classic® 0.33 oz/A + glyphosate	For improved control of morningglory, hemp sesbania and yellow nutsedge over glyphosate alone
<b>Postemergence</b>	DuPont™ Synchrony® XP	Synchrony® XP 0.375 oz/A + glyphosate	Provides an alternate mode of action to glyphosate, which helps deliver more-consistent performance.  Improved control of dandelion, lambsquarters, morningglory, yellow nutsedge and ragweeds
<b>Postemergence</b>	DuPont™ Assure® II	Assure® II 4-6 oz/A Can be tank mixed with several herbicides, including glyphosate, Classic® and/or Synchrony® XP.	One of the best grass herbicides for controlling volunteer glyphosate-tolerant corn in soybeans

## Introducing the DuPont Assurance First Performance Program

Every season, growers make many important choices that can affect the development of their crops and the success of their operations.

This year, when you choose to protect your corn or soybeans with DuPont Crop Protection products you get the proven performance growers have come to expect from DuPont along with the industry's leading technical expertise and the assurance you are working with a company that stands behind its products.

All are backed by the DuPont Service Policy where retailer credits cover costs for the herbicides. DuPont Performance Plus<sup>SM</sup> herbicide programs also cover application or adjuvant costs along with the cost of the herbicide.

Now you can maximize yields and enhance profitability while taking some of the uncertainty out of farming. Count on DuPont herbicides, insecticides and fungicides to help protect your crop, and get the backing and support of an industry leader.

Contact your local DuPont crop protection retailer or DuPont representative for the Performance Plus<sup>SM</sup> program that fits your farm.

*DuPont™ Enlite® may not be registered for sale or use in all states. See your local DuPont retailer or representative for details and availability in your state.*
