

## Vegetables

# DuPont™ Avaunt®

insecticide

## *Outstanding plant protection*

For years, DuPont™ Asana® XL, Lannate® and Vydate® L insecticides have provided vegetable growers with the proven performance they need to help grow good-looking and good-selling crops. The DuPont vegetable insecticide portfolio is better than ever. DuPont™ Avaunt® insecticide is available for use on even more vegetable crops.

### **Avaunt® is labeled for more crops, more pests**

An expanded label for Avaunt® covers more than 100 crops, including the following additions:

- Cucurbits
- Cole (Brassica Leafy vegetables)
- Leafy green vegetables
- Leafy petioles
- Spinach and varieties
- Tuberous and corm crops
- Tomato and pepper (bell and non-bell)
- Southern pea
- Stone and pome fruits
- Cranberry
- Grapes
- Mint

The expanded label also includes control claims for several additional pests:

- Diamondback moth
- Armyworms, including beet armyworms
- Cabbage looper
- Cabbageworms (such as cross striped cabbageworm and imported cabbageworm)
- Corn earworm
- European corn borer (except California)

### **Benefits of Avaunt®**

- Group 22 insecticide
- Labeled pests typically stop feeding in 0-4 hours for excellent crop protection
- Pest paralysis and death occur in 4-48 hours
- Short re-entry and preharvest intervals
- Ideal for IPM programs

### **Get fast, lasting control with Avaunt®**

Count on Avaunt® for long-lasting residual control of a broad spectrum of worms, including cabbage loopers, corn earworms, tomato pinworms and armyworms.

Once exposed, labeled pests stop feeding in 0-4 hours for excellent crop protection. What's more, Avaunt® features a mode of action that's easy on most beneficial insects when used in accordance with the label.

Plus, Avaunt® delivers 5 to 14 days of residual control to help keep pests under control long after it's applied. Ultimately, the amount of control you get will depend upon the insects present, the level of infestation, the crop and the environmental conditions.

### **Give yourself more time to get things done**

Avaunt® offers a short re-entry interval (REI) and pre-harvest intervals. The REI for most vegetables is just 12 hours and Avaunt® can be applied up to three days before harvest on several vegetable crops\*. As a result, you spend less time waiting to get into your fields, and have more time to get other things done.

\* Refer to the product label for REI and preharvest interval for each crop.

## Count on DuPont insecticides for performance where it really matters

Good-looking crops are good-selling crops. Trust DuPont™ Avaunt® and the following, proven DuPont Crop Protection products to help keep yours looking good — and selling — well:

- **Asana® XL insecticide:** Stop a broad spectrum of insects quickly and keep them under control with the extra-long residual of Asana® XL insecticide. Insects exposed to Asana® XL stop feeding almost immediately.
- **Lannate® LV and SP insecticides:** Protect the quality and value of your crops with fast-acting Lannate® insecticides. It controls the toughest pests, including thrips, aphids and beet armyworm. You can count on Lannate® for fast knockdown of many other tough pests to keep your crops looking good. Apply Lannate® alone, or in a tank mix. You'll like what you see.
- **Vydate® L insecticide/nematicide:** Count on Vydate® L to stop insects above and below the soil. It delivers broad-spectrum control that includes many species of beetles, aphids, thrips, fleahoppers, leafhoppers, and suppression of multiple species of nematodes.
