

DuPont Fire Extinguishants

Protect What Matters Most...

Safe for People, Safe for Assets, Safer for the Environment

DuPont™ FE-227™

DuPont™ FE-227™ is intended to prevent or extinguish fires in situations where conventional extinguishing agents such as water, dry chemical, and carbon dioxide are unacceptable. These situations exist primarily where there is electrical or sensitive electronic equipment servicing a critical operation, the loss of which would not only be the value of the equipment but also the cost of business interruption. Previously used extinguishants may cause collateral damage, significantly interrupt business productivity, or present a personal safety risk. DuPont™ FE-227™ is safe for use in applications where people are normally present in normally occupied spaces for both Class A and Class B fire assets.

Features

- A clean agent that leaves no residue
- Electrically nonconductive and noncorrosive
- Environmentally preferred alternative to Halon
- Zero ozone depletion potential (contains no chlorine or bromine)
- Replaces Halon 1301

Benefits

- Protection of people and sensitive or high value assets
- Continuity of business
- Low toxicity
- Efficiency
- Low cost

The miracles of science®

DuPont Fire Extinguishants

DuPont Fire Extinguishants business is committed to developing solutions that add value, improve safety and quality of life for people around the world, and provide you with peace of mind. Our goal in fire protection is to protect people and valuable assets—it's what matters most.
