Description:

- Single, early application can control all 10 turf-damaging white grub species as well as surface-feeding insects such as cutworms, webworms, annual bluegrass weevils and billbugs
- Active ingredient is Calteryx, a new class of chemistry inspired by a natural substance found in the bark of trees and shrubs of the genus Ryania
- Designed to control grubs and pests on a wide-range of sites including golf courses, athletic fields, parks and playgrounds as well as landscape ornamentals
- Has low impact on non-target organisms such as beneficial arthropods, bees, birds, fish and mammals
- Low water solubility
