Granular Acelepryn

DuPont Professional Products will highlight the new granular formulation of DuPont Acelepryn insecticide, which is registered by the U.S. Environmental Protection Agency (EPA). Acelepryn controls every turf-damaging white grub species and other key pests such as the annual bluegrass weevil, billbugs and caterpillars. Acelepryn is a new class of chemistry that provides control at the lowest application rate ever utilized for white grubs, according to DuPont. Acelepryn was granted reduced-risk status by the EPA in April 2007 for applications to turfgrass.
