## DuPont Acelepryn

Find  Entire Database  [Search Tips](#)

### Description:

- Acelepryn is a new class of chemistry that provides control at the lowest application rate ever utilized for white grubs
- Controls white grub species and other key pests such as annual bluegrass weevils, billbugs and caterpillars
- Controls multiple pests with single application, eliminating at least one treatment to control surface feeders
- Has the lowest water solubility of any white grub control product and a reduced-risk classification from the EPA
- Liquid formulation available now, granular formulation and fertilizer in 2009
