

Technology is speed.

Technology is accuracy.

Technology is *Vibrio* results
in less than 24 hours.

A new BAX® System Real-Time PCR assay uses proven PCR technology to quickly and accurately detect and differentiate three species of *Vibrio* in seafood—*V. cholerae*, *V. parahaemolyticus* and *V. vulnificus*—in less than 24 hours.

See this new technology in action!

Lunch and a demonstration will be provided in the Frost/Hawthorne room after the last session on Thursday morning, October 22.

Free to all ISSC attendees.
