

STOP™ Safety Training Observation Program Overview

STOP™ is a member of the DuPont portfolio of workplace safety training offerings now available from Coastal. The award-winning STOP™ series provides a path to workplace safety excellence by making safe behavior and workplace conditions part of the work culture, thus preventing injuries and incidents.

STOP™ For Each Other

STOP™ For Supervision
STOP™ For Ergonomics
STOP™ Implementation Assistance Workshop
STOP™ Implementation Resource
STOP™ Assessment Service

STOP™ programs use a combination of methods to give people the information, skills and willingness to work more safely, maximize their learning and apply what they learn to the real world. The programs feature a three-part approach:

- **Individual self-study.** Workbooks are used to introduce basic concepts and begin safety skill development.
- **Field or application activities.** STOP™ program participants practice what they have learned in their own work areas.
- **Group meetings.** After viewing a video, participants discuss what they have learned and consider how it can be applied.

STOP™ Programs Now Available

STOP™ For Supervision

A comprehensive, behavior-based training program, STOP™ For Supervision establishes the framework for the entire STOP™ series. It teaches managers, supervisors and team leaders how to observe people as they work. By talking with people to acknowledge safe acts and correct unsafe acts, workers are encouraged to follow safe work practices.

STOP™ For Each Other

Focuses on peer-to-peer safety, teaching participants to interact with their coworkers, incorporate safety in their everyday activities and make safety second nature.

STOP™ For Ergonomics

Builds on the principles and skills introduced in the STOP™ series and applies them to ergonomics, an essential component of workplace safety.

STOP™ Implementation Assistance Workshop

Conducted by DuPont STOP™ experts before you begin STOP™ implementation. Helps build a strong foundation for the STOP™ program and increases involvement across your organization.

STOP™ Implementation Resource

Provides expert assistance and advice on-site to objectively assess the implementation of any of the following STOP™ programs: STOP™ For Supervision, STOP™ For Each Other, and STOP™ For Ergonomics.

STOP™ Implementation Assessment

Reviews STOP™ implementation at your site to assess the success of the implementation, identify gaps and recommend next steps for improvement in your safety observation program.

STOP DataPro™

A web-based application that optimizes the value of STOP™ programs by making it easier to record and analyze safety performance data and generate reports. It quickly and easily enables in-depth understanding of workplace safety using your STOP™ observation data to review findings, identify trends, track corrective actions and monitor the frequency and effectiveness of safety observations.
