

Removing minor cuts and scratches*

Because the solid beauty of Corian® goes all the way through, Corian® surfaces are completely renewable. You can remove a minor cut or scratch yourself by following these instructions.

- Judge the severity of the scratch and start with the finest grit sanding pad to remove the scratch. (The color of the pads from roughest to smoothest are: White, Yellow, Green, Peach, Lilac, Blue, Gray.) Rub over scratch in a straight line to remove it. Periodically switch rubbing direction 90°. Be sure all of the scratch is removed. If this first step takes too long, try the next heavier grit sanding pad. To minimize dust during sanding, wet the surface. Rinse pad periodically to clean residue.
- Clean top with water. Select next lighter grit and repeat process. Rub over a larger area to blend in sanding.
- Continue process using successively finer grits until desired gloss level is achieved. Rinse out all pads used and air dry before putting them away.
