

DuPont™ Corian® and DuPont™ Zodiaq® Contributing to Sustainable Buildings

Our Commitment to Sustainability

DuPont is committed to strategies that drive sustainable growth and help our customers grow their businesses. For over 200 years, we have been putting science to work, reducing our environmental footprint and contributing to social and environmental progress worldwide. We are committed to apply our science and innovation to deliver sustainable solutions to markets around the world.

Durable, easy to maintain, and low-VOC emitting, DuPont™ Corian® solid surfaces and Zodiaq® quartz surfaces combine beauty and performance with a range of benefits designed to work together to help create healthier, safer buildings and homes.

Why low-VOC is important?

VOC (Volatile Organic Compound) is a carbon that vaporizes at normal room temperatures; this air contaminant reduces the indoor air quality and can be harmful to the comfort and well-being of you & your family.

Low-VOC Solutions

DuPont™ Corian®, DuPont™ Zodiaq®, and DuPont™ surface sealants and adhesives are GREENGUARD Indoor Air Quality Certified® for meeting or exceeding emissions guidelines for VOCs and meet the certification standards of GREENGUARD For Children & SchoolsSM.

Nontoxic and Nonallergenic

Nontoxic and nonallergenic to humans— DuPont™ Corian® and DuPont™ Zodiaq® are third-party certified to be free of heavy metals and comply with the EU Directive 2002/95EC on the Restriction of Hazardous Substances (RoHS).

Highest Level for Food Contact Certification

The vast majority of DuPont™ Corian® solid surface sheet and shape materials and DuPont™ Zodiaq® quartz surface materials are NSF/ANSI 51 Certified to the highest level for food contact for all food types. Public health officials often rely on NSF International guidelines to determine appropriate materials for use in food areas. NSF/ANSI Standard 51 “Food Equipment Materials” is applicable to materials and finishes used in the manufacture of food equipment. Product and color listings can be found at www.nsf.org.
