

Aesthetic Insight for Superior Design

Dark Colors add sophistication, elegance and style to a space. Like black cars and fashion apparel, dark surfaces can also show spots lighter surfaces may hide. To keep dark surfaces looking new, regular cleaning and maintenance are all that are required. In fact, we recommend using a gray Scotch-Brite® pad made specifically for dark colors. Rest assured, they're created with the same durability and renewability as any color of Corian®.

Veined aesthetics include Venaro White and the Private Collection colors. Each of these aesthetics displays delicate, random veining and a natural pattern. Please note that when these sheets are joined together, while the surface is consistent, the appearance is more indicative of how stone looks when joined versus the continuous appearance provided by most Corian® colors.

Lustra aesthetics include Blackberry Ice, Anthracite, Bronze Patina and Pompeii Red, which feature striking mirror-like flecks. As a result, the color appears to change when viewed from different angles. When viewed from the edge of the sheet, flecks tend to “disappear”, creating exciting tone-on-tone effects. Realizing the full potential of Lustra aesthetics requires special considerations when designing and assembling.

For more information on designing or fabricating with these aesthetics, consult DuPont or your distributor representative, or call 1-800-436-6072.
