DuPont Nonwovens Launches New Web site for DuPont™ Tyvek® Envelopes
New Site Offers Updated Product and Technical Information, Global Case Studies and Expert View

WILMINGTON, Del., July 10, 2008 – DuPont Nonwovens today announced the launch of its new global web site for DuPont™ Tyvek® envelopes, designed to provide visitors with new product and technical information about the broad portfolio of DuPont™ Tyvek® envelopes products and services.

The new web site is accessible at envelopes.tyvek.com. In addition to the user-friendly functionality and improved navigation, DuPont Nonwovens has expanded the content in sections such as "Benefits" and "Case Studies," designed to help current and potential customers understand how DuPont™ Tyvek® envelopes differ from other products in the marketplace. Case studies from countries such as Greece, France and India, along with case studies from North America, demonstrate first-hand how DuPont™ Tyvek® envelopes help businesses, organizations and institutions deliver high quality and reliable performance to customers and constituents around the world every day. The new site also features "Sales and Support" assistance by region, helping customers to easily connect with suppliers of Tyvek® envelopes and answer envelope questions.

An additional feature of the new site is an expert insight page which shares perspectives on the challenges and opportunities for today's envelope market. In the initial "Expert View," Jim Herrin, North America market manager for DuPont™ Tyvek® envelopes, examines the recent U.S. Postal Service rate case and its implications for businesses. "Expert Views" such as this will offer unique insights from DuPont specialists, based on their experience working with printers, office managers, financial services firms, and direct mail experts around the world.

Other site features include:

- Updated news and events
- FAQ's
- Updated web links

"The launch of our new web site provides customers with complete online access to DuPont™ Tyvek® envelopes' key products and services," Herrin said. "The site illustrates how they help to protect important, high-value and sensitive information for a variety of industries including financial services, legal, manufacturing, travel and health care."

Information about the upcoming Tyvek® Plus envelope substrate also can be found on the new site. Tyvek® Plus will feature a coated surface and a stiffer sheet structure, enabling improved print quality and ease of handling.

For more information about DuPont™ Tyvek® envelopes, visit the new web site accessible at tyvekenvelopes.com.

For more than 30 years, DuPont™ Tyvek® envelopes have led the industry in high-performance protection for valuable documents and important information. Exceptionally strong, yet extremely lightweight, Tyvek® envelopes save on mailing costs and reduce storage space requirements, while providing resistance to punctures, tears and moisture. The distinctive look and feel of DuPont™ Tyvek® envelopes reinforce the importance of their contents – customers count on Tyvek® envelopes to protect what's inside.

DuPont is a science-based products and services company. Founded in 1802, DuPont puts science to work by creating sustainable solutions essential to a better, safer, healthier life for people everywhere. Operating in more than 70 countries, DuPont offers a wide range of innovative products and services for markets including agriculture and food; building and construction; communications; and transportation.
