

Mold Prevention Programs

AIA/CES LEARNING UNITS

Provider: DuPont™ Tyvek® Weatherization Systems

Presenter: Susan Raterman, CIH

About the Instructor: Susan Raterman develops and implements proactive indoor air quality (IAQ) programs for building owners and managers that include IAQ policies, operations and maintenance programs, interiors materials selection, monitoring effectiveness of ventilation control strategies, and IAQ control during construction and renovation activities. Ms. Raterman is a frequent lecturer for organizations including Northwestern University, Illinois Institute of Technology, International Facility Management Association, Association of Licensed Architects, Construction Specifiers Institute, and the Environmental Protection Agency.

Program: Mold: Prevention is Cheaper Than the Cure - Introduction

Program #: RATER1

Credits: 1 LU Hour

HSW: Yes

Learning Objectives:

1. Understand mold impact on human health
2. Examine proper techniques for mold & moisture investigation
3. Clarify the selection of mold resistant materials in building design

Program: Mold: Prevention is Cheaper Than the Cure - Intermediate

Program #: RATER2

Credits: 2 LU hours

HSW: Yes

Learning Objectives:

1. Master fact from fiction regarding complex issues of mold in commercial structures
2. Examine proper techniques from architectural, engineering and industrial hygiene perspectives
3. Compare and contrast mold growth and proliferating buildings with proper architecture, design and construction

Program: Mold: The Problems and the Solutions – Advanced

Program #: RATER3

Credits: 3 LU hours

HSW: Yes

Learning Objectives:

1. Master fact from fiction regarding complex issues of mold in commercial structures
2. Examine proper techniques from architectural, engineering and industrial hygiene perspectives
3. Compare and contrast mold growth and proliferating buildings with proper architecture, design and construction
