

Performance Plus Stewardship

PRESENTING THE
DUPONT LX PLATFORM PRODUCTS

World class science. Relentless innovation. Superior-performing products. A commitment to safeguard the environment. These are the driving forces behind our new LX Platform products.

Your customers continue to demand high performance, cost-effective products which meet an acceptable environmental profile. The LX Platform products, based on our existing Zonyl® and Foraperle® chemistries, were developed to meet your demanding performance and value requirements, while removing nearly all trace levels of PFOA and direct precursors to PFOA. The LX Products are among the world's first commercial fluorotelomer products to meet the EPA's PFOA and direct precursor reduction criteria (including the reduction of higher homologue acids and direct precursors)—well ahead of the 2010 timeline!

Unrivaled performance and quality

The LX Platform products meet environmental requirements, while continuing to deliver the same high performance you have come to expect. LX Platform products have improved color and quality, and should lead to better finished products for you and your customers. The DuPont LX Platform products deliver performance plus stewardship.

“Drop-in” replacements means no disruption, no reformulation and no delay

Because the LX Platform products were developed using technology to remove unintended levels of PFOA and direct precursors, they are drop-in replacements for the existing DuPont products. We bring you LX Platform products so you can spend your time growing your business, and not on costly requalifications required by other chemistries.

The miracles of science™

The LX Platform products are listed on existing global regulatory clearances, such as United States (TSCA), Europe (EINECS), Canada (DSL) and Japan (ENCS). Partnering with DuPont is the best choice to ensure you are using and providing your customers with products that are backed by extensive safety and environmental testing including: rigorous toxicity testing; end-use consumer article evaluations; and environmental fate and effect analysis.

DuPont—For over 40 years, your partner in innovation

DuPont sells more than a product. We have the global scale, reliability of supply, and scientific expertise that can help you innovate and grow. Supporting your business are 150 experienced global sales, marketing and technical professionals that understand how our products can benefit your business. This team is supported with an infrastructure that includes R&D/application laboratories in Asia, Europe, and the United States, along with manufacturing facilities in Europe and the United States.

Put DuPont science to work for you. As the leading global producer of fluorotelomers, we have the widest range of applications and technologies. This includes a portfolio of more than 150 high-performance products for end-use applications such as flooring, solid surfaces (stone and tile), coatings and surfactants, leather, fire-fighting foams, textiles, nonwovens and paper. Our team of scientists can enable you to customize the LX Platform products to serve a limitless number of customer needs. We call it “The freedom to innovate”. Let us show you how to make it your key to success.

Call your local sales representative or 1-866-828-7009 to learn more about how our LX Platform products can help you grow your business.
